

The image shows a modern office environment. In the foreground, a person's hands are visible typing on a silver laptop on a light-colored wooden desk. The desk has a black metal frame. Behind the desk, there are glass partitions with wooden frames. In the background, another desk and a white wall are visible. A large potted plant is on the right side of the frame. The floor is made of light-colored tiles with a black and white striped pattern. The overall lighting is warm and modern.

Humly Desk Booking

A part of Humly Workplace Solutions

Book, reschedule, access and adapt

humly

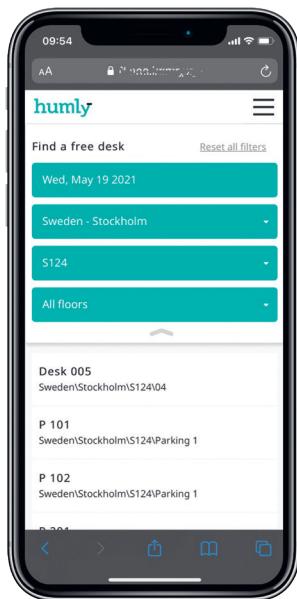

Humly Desk Booking is the modern and flexible workplace booking system for improving productivity. Start managing your office in a more efficient way with Humly Desk Booking.

Humly Desk Booking

Quickly identify and reserve desks to save time and minimize confusion. Humly Desk Booking is an extension of the comprehensive backend that brought you multi-domain booking in a secure and stable way. It is also fully integrated with one of the most used workplace apps in the world, Microsoft Teams.

Humly Desk Booking will help employees to find and book resources and workspaces. Humly Desk Booking helps companies manage a safe office capacity and to enhance the hybrid workplace experience. The perfect solution when you need the ability to have users from different domains and systems to be able to book the same desks, meeting rooms, parking spaces and more.

Humly Desk Booking.

Powerful, secure & trusted

Humly Desk Booking is offering market leading compliance, security and flexibility. Our solution is an extension of our comprehensive backend that brought you multi-domain booking, enterprise level security and ten years experience worth of managing your bookings. Our desk booking solution will enhance the workplace experience when the employees can book a desk or a workspace in a secure way.

Low maintenance, high usability, quick ROI

Our ultimate goal is to increase the time your end users spend being creative and adding value. Not interacting with complicated technology, generating service tickets or being frustrated. That is why we built a completely integrated and flexible solution, relying on logical and easily adaptable wayfinding.

One single click

Book desks with ease and without any disruptions. Right in your Microsoft Teams app, with single sign-on. No need to remember login credentials in third party apps.

Invite guests

Humly Desk Booking utilizes the current users in your active directory and the current building structure that you already have in place. It is also possible to invite guest users from any domain.

Open API and supported systems

Humly provides an open API for third party integrations and communication via real-time two-way connections. Remote management with multi-site support and real-time monitoring are also included. Office 365, Exchange Server and Google Workspace are some of the booking systems you can use with Humly Desk Booking. It is also possible to run Humly stand alone with our own reservations backend.

Full Microsoft integration

Most employees do not use third party apps for work. The exception is Microsoft Teams, one of the most used workplace apps in the world. That's why we decided to integrate our desk booking app with the app your employees already have. Access Humly Desk Booking, part of Humly Reservations, through Microsoft Teams using single sign-on. Less friction, more focus.

Humly Workspace as a Teams app.
