

## PPL 2500 Projector lift system

The PPL 2500 projector lift system is the perfect solution for the integration of a large projector at a ceiling for example in an auditorium or conference hall. The lift is equipped with a heavy-duty but silent motor which assures a fast and stable up-down movement of the projector. Furthermore, the motor is provided with an RF remote controller and offers the possibility to set three motor limit stops: an upper, intermediate and a down stop. The intermediate stop can be set at the desired height for projection mode, whereas the down one can be adjusted up to 500 cm stroke and can be used as a service mode position. The maximum weight capacity of the projector lift is 70 kg.
