WyreStorm Essentials Specification Sheet

WyreStorm - Powerful. Reliable. Simple.

Introduction

The WyreStorm EXP-MX-0404-H2 is a powerful plug and play 4K matrix switcher solution. With 18Gbps pure HDMI support, the EXP-MX-0404-H2 allows up to four UHD 4K sources to be independently routed to four UHD displays. Each Output has the capability to scale 4K content down to connected 1080p displays without affecting the 4K source. Furthermore, source audio breakout via digital coax supports to 5.1, which can be sent to an AVR for audio distribution. Additionally, the EXP-MX-0404-H2 boasts an enhance API, giving the user full control over RS-232 or IP. Lastly, the EXP-MX-0404-H2 supports automatic and time delayed CEC, powering displays on when a new source is detected and off when source sink isn't present, making the EXP-MX-0404-H2 a powerful, complete solution.

Key Features

- SCALING 4K TO 1080P AUTOMATICALLY
- Like the EXP-MX-0402-H2, all outputs of the EXP-MX-0404-H2's are built with an effective scaler, taking in a 4K signal and downscales the content to 1080p, allowing a mix of 4K and 1080p screens to both show at their highest potential without affecting HDMI handshake or 4K source.
